Q. Mucius augur multa narrare de C. Laelio socero suo memoriter et iucunde solebat nec dubitare illum in omni sermone appellare sapientem. ego autem a patre ita eram deductus ad Scaevolam sumpta virili toga, ut, quoad possem et liceret, a senis latere numquam discederem. itaque multa ab eo prudenter disputata, multa etiam breviter et commode dicta memoriae mandabam, fierique studebam eius prudentia doctior. quo mortuo me ad pontificem Scaevolam contuli, quem unum nostrae civitatis et ingenio et iustitia praestantissimum audeo dicere. sed de hoc alias, nunc redeo ad augurem.

### PRAEFATIO.

(PL 63 1079A)

In dandis accipiendisq[ue] muneribus, ita recte officia, praecipue inter eos qui sese magnificiunt, aestimantur, si liquido constabit, nec ab hoc aliud quod liberalius afferret inventum, nec ab illo unquam, quod iucundius benevolentia complecteretur acceptum. Haec ipse considerans, attuli non ignava opum pondera, quibus ad facinus nihil instructius est, cum habendi sitis incanduit. Ad meritum nihil vilius, cum ea sibi victor animus calcata subiecit, sed ea quae ex Graecarum opulentia litterarum, in Romanae orationis thesaurum sumpta conveximus. Ita enim mei quoque operis mihi ratio constabit, si quae ex sapientiae doctrinis elicui, sapientissimi iudicio comprobentur. (1079B)

Willkommen auf den Seiten von CAMENA - Digitale Bibliothek lateinischer Texte der Frühen Neuzeit. Unser Angebot besteht aus fünf Textsammlungen unterschiedlichen Zuschnitts und einer im Aufbau befindlichen Datenbank, die Stichwörter mit strukturierten Kontextdaten erfasst und Verknüpfungen zu einschlägigen Textstellen herstellt (siehe [EVRECA](#)). Von 1999 bis 2008 hat die Deutsche Forschungsgemeinschaft (DFG) den Aufbau dieser Bibliothek ermöglicht. Die Arbeit wird nun teils im Rahmen des vom Bundesministerium für Bildung und Forschung (BMBF) geförderten Projektes eAQUA, teils durch den vom [Istituto Italiano per gli Studi Filosofici](#) geförderten Aufbau einer neuen Sammlung ([ITALI](#)) fortgesetzt. Wie von Beginn an stellt auch weiterhin die Universitätsbibliothek Mannheim die aus ihren historischen Buchbeständen ausgewählten Vorlagen zur Verfügung, während das Rechenzentrum der Universität Mannheim die Web-Server-Administration leistet.

[1] I. Quo usque tandem **abutere**, Catilina, iste tuus nos eludet? quem ad finem nocturnum praesidium Palati, nihil concursus bonorum omnium, nihil horum ora voltusque moverunt? Patet horum omnium scientia teneri coniuratum quid superiore nocte egeris, ubi fueris, quem nostrum ignorare arbitraris? [2] O tempora, o mores! Seneca intellegit. Consul videt; hic tamen vivit. Vivit? immo vero etiam in senatu venit, fit publici consilii particeps, notat et designat oculis ad caedendum quemque nostrum. Nos autem fortes viri satis facere rei publicae vicissitudinis istius furorem ac tela vitemus. Ad mortem te, Catilina, duci iussu conprobratum pridem oportebat, in te conferri pestem, quam tu in nos [omnes] machinaris.

## WHAT IS HEXAMETER?

Hexameter is the standard pattern of long and short syllables used by the Romans and Greeks for writing epic poetry. Learning the proper metrical structure of a line (and there are 16 different possibilities) is key to understanding the poetry, because ancient poetry was meant to be heard, not just read. In classical hexameter, the six feet follow somewhat standard rules. [Click here to learn more about them.](#)

# ENIGMA

- <http://ciham-digital.huma-num.fr/enigma/>

## Enigma

### Unpuzzling difficult Latin readings in medieval manuscripts

*Enigma* helps scholars to decipher Latin words which are difficult to read in medieval manuscripts. It is sometimes impossible to decipher all the letters in a word, for various reasons (difficult palaeography, unclear writing, damage to the document, etc.) If you type the letters you can read and add wildcards, *Enigma* will list the possible Latin forms, drawing from its database of more than 400 000 forms.

Nota bene: *Enigma* does NOT solve abbreviations. To do so, you can resort to A. Cappelli's famous dictionary, available online ([ed. Milan, 1912](#), and [ed. Leipzig, 1928](#)). If you cannot resolve an abbreviation, replace it by a wildcard in your *Enigma* query.

In the field above, type in the letters that you can read in the medieval document. You can use the following wildcards:

- **The asterisk replaces any string of 0 to n characters.** Examples:
  - \*nimur  
Will retrieve all words ending with "nimur", whatever their beginning.
  - abst\*  
Will retrieve words beginning with "abst", whatever their ending.
  - \*atel\*
